## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Independent Claims 7, 16, 18-19 teaches the limitations of a source node and plurality of target nodes in a group membership in communication with a second message queue and acknowledge and sync messages used in the second queue and a fragmentation size change message utilizing the second queue to modify the fragmentation size cluster communication parameter of the group in combination with the dependent claims 3, 5, 8, 12, 14, 17, 20.

The prior art does not teach the cited limitation.

The Moiin reference teaches a method for dynamically modifying a cluster communication parameter in a cluster computer system and processing a request to change the parameter. The Monteiro reference teaches changing a fragmentation size in a packet. No prior art reference of record implements or suggests all the limitations of the claimed limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
